BRIVO ACCESS CAM

The eyes and ears protecting your facility by connecting video to access events

Integrated Video for Access Control at Your Fingertips

Brivo delivers a flexible camera-to-cloud recording solution that gives you real-time views of your facility and simplifies incident investigations by linking access control events with video.

The solution ensures your video is securely stored in the cloud for remote access and to prevent loss.

BRIVO ACCESS CAM BENEFITS

- Integrated access control and video surveillance in one single interface

- Get high quality HD video and storage without the cost and hassle of on-prem systems

- Enable Brivo Snapshot with Access Cam to save time with AI-based facial detection

- Forget worrying about video loss with cyber-secure cloud storage

- Reduce incident review time with just two-clicks to play video clips associated with an access control event.

- Gain flexibility to choose video resolutions and retention options based on your organizations needs and adjust over time

- Choose from modern camera hardware options to meet your property and compliance requirements

Camera Options from Brivo*:

INDOOR & OUTDOOR POE DOME

OUTDOOR POE BULLET

INDOOR WIRELESS CUBE
